## PROJECTS

### CRM Software

🌐 <https://eduardmin.herokuapp.com/>

Designed and developed a CRM web software that can be used for an educational institution to manage and track enquiries and admission.

This is a comprehensive institute admission management system that integrates all the processes of an educational institution such as enquiry, follow ups and admission. The product suite addresses all the critical business functions such as Financial Management, Revenue Accounting and Internal Reports, etc.

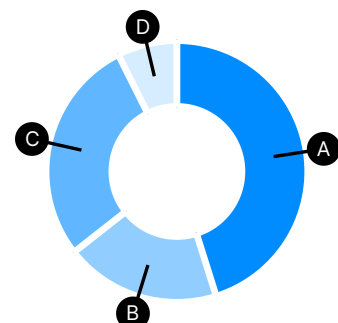

- Duration: 1 Month
- Tools and Technologies used: Python, Django, ORM, HTML, CSS, JavaScript, Ajax

### Order Tracking and Invoice Generation System

Designed and developed a web software to track and manage orders with different status and generate invoices for customers.

- Duration: 1 Month
- Technologies used: Python, Django, ORM, HTML, CSS, JavaScript, Ajax
